### Profile

I am a self-motivated, practical problem solver who is eager to learn and undertake new challenges. I am dedicated and passionate about using my technical skills to benefit other people and organizations.

Below you'll find projects I have completed that showcase my skills and general background in developing software.

### Skills

HTML/CSS/SCSS

JavaScript

ReactJS

NextJS

jQuery, AJAX

NodeJS

Golang

MongoDB

GraphQL

Firebase

Git

### Projects

#### Kopiku [↗](#)

Kopiku is a web application for selling coffee beans and snacks. It features a landing page, a product page, and a minimal shopping cart. Built with ReactJS, React-Router and SCSS.

#### DomLaw [↗](#)

A business consulting and investment platform. Built with NextJS with a focus on accessibility and component reusability.

#### RDX [↗](#)

RDX is a Golang CLI tool for previewing readme and other markdown files. It recursively walks a given directory, parses and opens readme-files in the browser.

#### Daily UI [↗](#)

From nav menus, AJAX requests and DOM manipulations. This project is a collection of some of the most common UI components that are found on the web. It is made with HTML, CSS, and JavaScript.
